

APPENDIX B LIST: Projects consulted on after Recovery Implementation Program Initiation (January 1988) which are eligible to participate in the 15-Mile Reach Programmatic Biological Opinion.

Updated through 12/31/2011

Every 5 years, beginning in water-year 2005 (this was delayed until 2007), Colorado will report to the Program estimated average annual volumes of depletions from the Colorado River basin in Colorado.

The 15-Mile Reach Programmatic Biological Opinion covers up to 1 million acre-feet of historic depletions whose project proponents sign a recovery agreement. Most eligible projects within this 1MAF have never been consulted on or underwent consultation prior to January 1, 1988, and thus, are not reflected in this list.

* An asterisk in the "Federal Agency" column denotes a consultation added or information modified in the last quarter.

For purposes of any future reinitiation of consultation, depletions have been divided into two categories:

Category 1 depletions consist of: a) existing depletions, both Federal and non-Federal as described in the project description, from the Upper Colorado River Basin above the confluence with the Gunnison River that had actually occurred on or before September 30, 1995 (average annual of approximately 1 million acre-feet/year); b) depletions associated with the total 154,645 acre-feet/year volume of Green Mountain Reservoir, including power pool (which includes but is not limited to the all of the 20,000 acre-feet contract pool and historic user's pool), the Colorado Big-Thompson replacement pool; and c) depletions associated with Ruedi Reservoir including Round I sales of 7,850 acre-feet, Round II sales of 6,135 acre-feet/year as discussed in the Service's biological opinion to Reclamation dated May 26, 1995, and as amended on January 6, 1999, and the Fryngpan Arkansas Project replacement pool as governed by the operating principles for Ruedi Reservoir, but excluding 21,650 acre-feet of the marketable yield. Category 1 depletions shall remain as Category 1 depletions regardless of any subsequent change, exchange, or abandonment of the water rights resulting in such depletions.

Category 1 depletions associated with existing facilities may be transferred to other facilities and remain in Category 1 so long as there is no increase in the amount of total depletions attributable to existing depletions. However, section 7 consultation is still required for Category 1 depletion projects when a new Federal action occurs which may affect endangered species except as provided above under "Individual Consultation Under the Umbrella of this Programmatic Biological Opinion." Reinitiation of this consultation will be required if the water users fail to provide 10,825 acre-feet/year on a permanent basis.

Category 2 is defined as all new depletions up to 120,000 acre-feet/year; this includes all depletions not included in Category 1 that occur after 1995 regardless of whether section 7 consultation has been completed. This category is further divided into two 60,000 acre-feet/year blocks of depletions.
