Fax: (303) 866-4474
e-mail: ray.alvarado@state.co.us
e-mail: michelle.garrison@state.co.us

III. Project Summary:

The CRDSS supports better decision making with respect to the utilization of Colorado River water resources. In relation to the Recovery Program, CRDSS is being used to evaluate the physical and legal water availability at different locations along a stream and to determine the amount of water available for instream flow appropriations. It can also provide information to help determine the impacts of endangered fish flows on Colorado's ability to develop its full compact apportionment. A significant part of these CRDSS efforts have contributed to decision making on the 15-Mile Reach PBO and the accounting system. This accounting system requires significant work every five years. CRDSS is also being used in the Aspinall EIS process to evaluate the alternatives and determine impact to Gunnison River water rights.

IV. Study Schedule:

The project started in 1993. Phase IIIb (extension of basin models) was completed in July 2000. A funded maintenance program has been established to provide Colorado state employees for ongoing maintenance and data updates.

V. Relationship to RIPRAP:

Assess legal and physical availability of water and compact considerations associated with the protection of instream flow water rights for endangered fish and their critical habitat in the Little Snake River, the Yampa River above and below the Little Snake River, the White River, the Colorado River (mainstem), and the Gunnison River. Provide hydrology support to develop and evaluate flow augmentation alternatives for the Yampa and Little Snake Rivers.

RIPRAP Activity Numbers:

Yampa and Little Snake Rivers: I.A.1.d., I.B.3., I.C.3., I.D.2.

White River: I.C., I.D.

Colorado mainstem: I.A.3., I.A.4., I.B.3

Gunnison River: I.B., I.C.

VI. Accomplishment of FY 2006 Tasks and Deliverables, Discussion of Initial Findings and Shortcomings:

- The database to run the CRDSS tools and planning models is online and has been fully populated with data including structure diversion records, climate data, water rights information and streamflow data through water year 2005. This can be viewed on the Internet at *cdss.state.co.us*.
- The maintenance program provided the following improvements to the CRDSS model that will directly benefit the Recovery Program:
 1. The Gunnison River basin monthly and daily models are being updated and used to support the Aspinall Reoperations EIS process for the Gunnison Flow Recommendations.
 2. Irrigated acreage information for the 2005 irrigation season was obtained via satellite imagery, orthophotos, and ground investigation. The information will be added to the CRDSS database.
 3. The CRDSS tools continue to be updated and enhanced to provide improved usability and features.
- The Colorado River basin planning model has been updated in preparation for the upcoming stream depletion accounting for the 15-Mile Reach. Improvements include updated data, new features, and the creation of a daily model from the monthly model.
- The White River planning model is being updated.

VII. Recommendations:

No recommendations. CWCB will continue providing funding and staff for use and maintenance of the CRDSS.

VIII. Project Status:

The initial CRDSS project is complete. All other changes, improvements, and updates are part of the ongoing CRDSS maintenance program.

IX. FY 2006 Budget Status

A. Funds Provided:	\$150,000	State of Colorado funding + in-kind services
B. Funds Expended:	\$150,000	
C. Difference:	\$ 0	

D. % of FY 2006 work completed, projected costs to complete:

100% of the FY 2006 tasks were completed.

E. Recovery Program funds spent for publication charges: \$0

X. Status of Data Submission:

Not applicable, however, the CRDSS models and data can be viewed online at cdss.state.co.us.

XI. Signed: Ray Alvarado

Date: November 9, 2006
