- IV. Abstract: The Price-Stubb Diversion Dam is located on the Colorado River approximately 2 miles upstream from the Town of Palisade CO. The dam was identified as an impediment to the upstream movement of endangered fish and the UCRIP subsequently constructed a non-selective fish passage structure. The fish passage is a run-of-the-river facility which normally does not require active management other than the annual removal of debris following spring runoff.
- V. Study Schedule: The Price-Stubb Fish Passage will require annual inspections to identify needed maintenance, repair and debris removal. Based on the most recent inspection we do not anticipate significant maintenance or repair work in the foreseeable future barring extremely high spring runoff events.
- VI. Relationship to RIPRAP: Colorado River Action Plan: Mainstem II.B.1
- VII. Accomplishment of FY 2015 Tasks and Deliverables, Discussion of Initial Findings and Shortcomings: Following spring runoff in 2015 the fish passageway was inspected and debris was removed from the baffles using a track mounted excavator and manual laborers.
- VIII. Additional noteworthy observations: None
- IX. Recommendations: Continue to conduct annual inspections following spring runoff and other significant flow events. Conduct maintenance, repair and debris removal work as necessary.
- X. Project Status: Ongoing.

XI. FY 2015 Budget Status

- A. Funds Provided: \$6,000
- B. Funds Expended: ~\$3,000
