- I. Title of Proposal: Wahweap State Fish Hatchery Operation and Maintenance
- II. Relationship to RIPRAP:
 - General Recovery Program Support Action Plan
 - IV. Manage genetic integrity and augment or restore populations
 - IV.A. Genetics Management
 - IV.A.4 Secure and manage genetic stocks in refugia
 - IV.A.4.a Razorback sucker
 - IV.A.4.b Middle Green River
 - IV.A.4.b Bonytail
 - IV.C. Operate and maintain facilities
 - IV.C.3 Wahweap State Fish Hatchery
 - Green and Colorado River Action Plans: Mainstem
 - IV.A. Augment or restore populations as needed and as guided by the Genetics Management Plan.
 - IV.A.1. Develop augmentation plan for the four endangered fishes of the Green and Colorado River.
 - IV.A.1.c Implement Plan.

III. Background/Rationale and Hypotheses:

Wahweap State Fish Hatchery rears bonytail to recommended size in two growing seasons. Warm temperatures and longer growing season at Wahweap maximize growth and production of bonytail.

IV. Study Goals, objectives, and End Product:

Goal:

Contribute and assist with the recovery of the endangered fish species in the Upper Colorado River basin by rearing healthy fish for stocking in the basin recommended by the revised integrated stocking plan (.

Objectives:

Operate a hatchery facility that supports a genetically sound propagation program for high priority endangered fish species for the UCRRIP in the Upper Colorado River Basin in accordance with the Annual Propagation Facilities Operation Plan and state stocking plans by holding and rearing endangered fish.

End Products:

- 1) Propagation technology and methodology
- 2) Bonytail for research and stocking
- 3) Maintain backup razorback brood populations for the Upper Colorado River Basin

V. Study area:

Utah Wahweap State Hatchery, Big Water UT

VI. Study Methods and Approach:

Conduct all tasks associated with the operation and maintenance of propagation facilities for endangered fishes such as pond culture, marking fish, maintaining records of pedigreed family lots, etc. First priority for Wahweap is to raise bonytail for stocking to meet Utah's stocking plan. The second priority is to maintain razorback sucker backup brood stock for the Upper Colorado River basin.

VII. Task Description and Schedule:

Tasks: Rear bonytail, PIT tag, and stock. Maintain backup razorback sucker brood stock.
