Date: April 30, 2011

**Category:**
- Ongoing project
- Ongoing-revised project
- Requested new project
- Unsolicited proposal

**Expected Funding Sources:**
- Annual funds
- Capital funds
- Other (explain)

I. Title of Proposal:

Utah Program Management.

II. Relationship to RIPRAP:

General Recovery Program Support Action Plan
Provide Program Planning and Support.

III. Study Background/Rationale and Hypotheses:

The Upper Colorado River Endangered Fishes Recovery Implementation Program supports multiple projects undertaken by the Utah Division of Wildlife Resources. The work is conducted within three Division Regions in Utah (Northeast, Southeast, and Southern Regions) as well as from the Native Aquatic Species Coordinators office in Salt Lake City. Additionally, the Division cooperates and coordinates with other agencies and
researchers across state boundaries within the Colorado River Basin. Efficient coordination of field activities, reporting of research and monitoring results in a timely manner, accurate fiscal accounting, and effective program administration require statewide participation and oversight.

IV. Study Goals, Objectives, End Product:

Goal - Conserve and recover the endangered fish species of the Colorado River system.

Objective - Develop, administer, and direct a conservation and monitoring program that leads to endangered fish recovery.

End Product - Develop, prioritize, direct, coordinate, monitor, and annually evaluate Colorado River fishes work program activities, contracts, and budgets for the Utah Division of Wildlife Resources. Administer the field operations and reporting commitments in the Northeast and Southeast Regions working to recover the federally listed endangered fishes of the Colorado River Basin. Provide coordination and administration for the Wahweap State Fish Hatchery, Big Water, Utah (Southern Region). Coordinate and cooperate with other agencies. Provide a program management annual report to the Program.

V. Study Area

The Upper Colorado River basin in Utah, including the Green River and its tributaries.

VI. Study Methods/Approach

Statewide program management for the Utah Division of Wildlife Resources will be conducted from the state office in Salt Lake City. Program management is the responsibility of the Native Aquatic Species Program Coordinator, who is tasked with coordinating the Division’s Native Aquatic Species programs in the Northeast and Southeast Regions and the Wahweap State Fish Hatchery. A professional biologist (Wildlife Biologist II) and an administrative assistant (Office Specialist II) support the Coordinator. In federal fiscal year 2012, the Program Biology Committee representative will be Krissy Wilson, the Native Aquatics Program Coordinator, and the designated alternate is Sarra Jones, the Native Aquatics Program Biologist in the Salt Lake Office.

The UDWR Northeast Region (NER) office is located in Vernal, Utah, and is responsible for facilitating operations on the middle Green River and associated tributaries. The Project Leader in this region is supported by one full-time biologist and up to ten seasonal employees, depending on the time of year, and by UDWR office support staff. In fiscal years 2012 and 2013, the Northeast Region office will conduct or participate in at least five Program projects.
The UDWR Southeast Region (SER) oversees the Moab (Utah) Field Station, a location that provides ready access to the lower Green River and its tributaries, and to the Colorado River from the Colorado border downstream to Lake Powell. The Project Leader in this region has two full-time professional biologists on staff and up to ten seasonal employees. A part-time clerk supports the Field Station. In fiscal years 2012 and 2013, the Southeast Region, Moab Field Station, will conduct or participate in at least four Program projects.

VII. Task Description and Schedule

The Program Coordinator is responsible for: attending Biology Committee meetings; preparing Program proposals; reviewing Program technical proposals; developing Program statements of work, and internal workplans, budgets, and contracts for approved work; preparing annual reports for the Program; coordinating fiscal management of Program scopes of work; attending Colorado River researchers meetings; administering and overseeing approved proposals and contracts; serving as the Utah member of the Colorado River Fishes Recovery Team; providing review and comment on Biology Committee issues and reports; participating in other technical group assignments; coordinating program activities within the Section, Division, and among other agencies; reviewing and commenting on Program and agency reports as requested; and other administrative duties as needed, including personnel management. Work is conducted throughout the year. A professional biologist and an administrative assistant participate in and support these efforts.

Regional Project Leaders in Vernal and Moab develop, administer, and participate in Program projects in Utah; coordinate permanent and temporary staff assignments; administer employees, including hiring and firing decisions; coordinate schedules to ensure all Program commitments are addressed; develop Program statements of work, internal workplans, and associated budgets; attend Colorado River researchers meetings; administer and provide oversight of approved proposals and contracts; review and comment on Biology Committee issues and reports; participate in other technical group assignments; coordinate program activities within the Section, Division, and among other agencies; review and comment on Program and agency reports as requested; and perform other administrative duties as needed.

The Wahweap State Fish Hatchery actively supports efforts to propagate bonytail and razorback sucker. It receives bonytail fry from the Dexter National Fish Hatchery, New Mexico, and rears them to sizes approved by the Program. These juvenile bonytail are stocked in Utah and Colorado to support stocking goals determined by the Program Biology Committee. Wahweap holds backup brood stock of razorback sucker to support the Ouray National Fish Hatchery. The backup stock provides some security in the event of a catastrophic loss at Ouray. Program management support helps coordinate the efforts of Wahweap with Division and external clients.
VIII. FY-2012 Work

- Deliverables/Due Dates

Program annual reports or annual updates: 15 December 2012
Program statements of work and budgets: 15 December 2012
Review of regional work plans for Colorado River Basin: 1 April 2013
Program research proposals: 30 April 2013
Individual project reporting as described in individual scopes of work
Completion of other tasks as assigned

Budget by task:

Labor

SLO
Wildlife Biologist II (35% full time employment @ $29.75/hr) $21,762
Office Specialist II (20% full time employment @ $20.58/hr) $8,602
Program Coordinator (33% full time employment @ $40.98/hr) $28,142

NERO
Project Leader (30% full time employment @ $40.98/hr) $25,694
Wildlife Biologist II (5% full time employment @ $29.75/hr) $3,109

SERO
Wildlife Biologist II (3% full time employment @ $29.75/hr) $1,864

Travel (Vehicle + hotel) $8,500
Per Diem $2,700
Utilities $44,461
Total $164,592
FY-2012 Work

- **Deliverables/Due Dates**

Program annual reports or annual updates: 15 December 2013
Program statements of work and budgets: 15 December 2013
Review of regional work plans for Colorado River Basin: 1 April 2014
Program research proposals: 30 April 2014
Individual project reporting as described in individual scopes of work
Completion of other tasks as assigned

Budget by task:

**Labor**

**SLO**
Wildlife Biologist II (35% full time employment @ $29.75/hr)  $ 21,762
